>>would be a nationwide emergency frequency (similar to the FAA scheme) open to
>>all for use and monitored by all police/fire/emergency services.

>

>We already have one of those. It's called channel 9.

Unfortunately, channel 9 is on a frequency that is often not useful for local communications (which you assumedly want if you're looking for police/fire/emergency commo.) You really need something in the VHF/UHF frequency range. Talking to west Texas from Massachusetts can be fun in some instances, but not if you're trying to get an ambulance.

Subject: NASA Prediction Bulletins

The most current orbital elements from the NASA Prediction Bulletins are carried on the Celestial RCP/M, (513) 427-0674, and are updated several times weekly. Documentation and software are also available on this system. As a service to the amateur satellite community, the most current of these elements are uploaded weekly to sci.space. This week's elements are provided below. The Celestial RCP/M may be accessed 24 hours/day at 300, 1200, or 2400 baud using 8 data bits, 1 stop bit, no parity.

Subject: rec.ham-radio is out of control
Message-ID: <614@ryn.esg.dec.com>

In article <Dec.11.09.56.33.1989.12326@topaz.rutgers.edu>,
msmith@topaz.rutgers.edu (Mark Robert Smith) writes...
>The charter of rec.radio.shortwave specifically INCLUDES monitoring,
>on all bands. Unlike the elitist asses on rec.ham-radio, the founders
>of rec.radio.shortwave (and the voters) decided to include ANYTHING
>remotely close to monitoring shortwave radio.

No hobby that I'm aware of is completely free of asses. Please don't
the many by the ravings of the few.

Subject: rec.ham-radio is out of control
Message-ID: <4171@amelia.nas.nasa.gov>

Found in rec.ham-radio:
In article <30500318@ux1.cso.uiuc.edu> phil@ux1.cso.uiuc.edu writes:
=>> AT LEAST get the *&^%*&%* SWL and monitoring stuff out of here! I
=>> mentioned this before. There now is a rec.radio.shortwave and yet
=>> this groups still gets deluged with frequency posts and other massive
=>> volumes of SWL related stuff.
=>Why do you think that the monitoring stuff should be in rec.radio.shortwave?
=>There are those who do one or the other and don't want anything to do with
=>the one they weren't interested in. By the NAME of the group, shortwave
=>listening goes there, but monitoring is still left out in the cold, and most
=>people still expect it to be HERE. So until someone gets off their other
=>end and sets up rec.radio.monitor I will continue to expect it to be here.

Phil, (and everyone else),

My understanding was that rec.radio.shortwave would be a place
for anyone interested in the monitoring hobbies to come for
discussion. There have already been several articles on jammers,
scanning, and broadcast band dxing there.

As a matter of fact when this was first discussed in news.groups
thename considered was rec.radio.monitoring. Because a number
of people felt that r.r.sw would be more descriptive for the
average usenetter, the name approved, (by vote), was r.r.sw.
However the charter allows the discussion of any monitoring topic.

Come on over.....we would love to have you if you are interested in
these topics.
